## PROFESSIONAL PROFILE

C#/.NET engineer with six years of commercial experience building and supporting a finance ERP used by 200–250 people across nine businesses. At MicroKosm, I deployed on group of 9 companies and progressed from Software Engineer to Senior Software Engineer and Technical Product Manager, working across C#, SQL Server, production support, code review and mentoring. I also coordinated five graduates delivering web ERP features.

## TECHNICAL SKILLS

**C# and .NET:** C#, .NET Framework 4.6/4.8, ASP.NET Core Web API, REST APIs, WPF, XAML, Entity Framework 6, EF Core, LINQ, DevExpress

**Data and troubleshooting:** SQL Server, SQL investigation, data integrity, query and application performance troubleshooting, production defect diagnosis

**Testing and delivery:** Postman, API and functional testing, Git, Jira, Trello, Agile/Scrum, release coordination, requirements gathering

**Leadership and delivery:** Code review, mentoring, feature planning, Agile/Scrum, release coordination, requirements and stakeholder communication

**Cloud and CI/CD exposure:** AWS ECR/EC2 and Jenkins

## PROFESSIONAL EXPERIENCE

### MICROKOSM | Islamabad, Pakistan | Sep 2019 – Jul 2025

#### Technical Product Manager | Jan 2024 – Jul 2025

- Worked with finance, procurement and inventory teams to agree ERP changes, document requirements and prioritise releases across nine businesses and approximately 200–250 users.
- Coordinated a five-person graduate team delivering web ERP features with ASP.NET Core Web API and Angular; reviewed authentication, role-based access, employee, chart-of-accounts and inventory work.
- Managed feedback, priorities and release updates with business stakeholders and developers.

#### Senior Software Engineer | Aug 2021 – Dec 2023

- Built accounting and operations features using C#, .NET Framework, WPF/XAML, Entity Framework 6, SQL Server and DevExpress.
- Rectified and deployed production issues involving Entity Framework tracking, SQL and data integrity, memory use, application performance and Office integrations; tested fixes against affected workflows.
- Integrated Outlook with the ERP to handle more than 5,000 email items and implemented a 15-minute idle logout across more than 100 open application windows.
- Delivered ledger, reconciliation, multi-currency and inter-company workflows; reviewed code and mentored junior developers.
- Developed tested and deployed complete procurement modules for finance firms.
- Developed role and access-based control engine to handle user roles and company permissions.
- Delivered internal departmental chat application to communicate over transactions.

#### Software Engineer | Sep 2019 – Jul 2021

- Implemented sales, purchasing and inventory changes across WPF screens, application logic and SQL Server.
- Reproduced reported defects, corrected data issues and verified fixes before release across sales, purchasing and inventory workflows.
