PROFESSIONAL PROFILE

Software engineer with nearly six years of experience building, supporting and improving finance and operational software. Progressed through three roles at MicroKosm, working on a C#/WPF ERP used by approximately 200–250 users across nine businesses. Combines hands-on .NET and SQL Server development with production incident investigation, data integrity troubleshooting, requirements analysis and technical delivery.

TECHNICAL SKILLS

C# and .NET: C#, .NET Framework 4.6/4.8, ASP.NET Core, WPF, XAML, Entity Framework 6, EF Core, LINQ, DevExpress
Data and support: SQL Server, relational data, production support, incident investigation, root-cause troubleshooting, data validation, performance and memory analysis
Web and APIs: REST APIs, Angular, TypeScript, DevExtreme, Postman, API and functional testing
Delivery: Requirements analysis, stakeholder communication, Agile/Scrum, release coordination, code review, mentoring, Git, Jira, Trello

PROFESSIONAL EXPERIENCE

MICROKOSM | Islamabad, Pakistan | Sep 2019 – Jul 2025

Technical Product Manager | Jan 2024 – Jul 2025

- Turned finance, procurement and inventory needs into ERP requirements, specifications and release priorities for nine businesses and approximately 200–250 users.
- Guided five graduate developers through an ASP.NET Core and Angular migration, reviewing authentication, role-based access, employee, chart-of-accounts and inventory features.
- Coordinated stakeholder feedback, issue priorities and release delivery, keeping development work aligned with operational needs.

Senior Software Engineer | Aug 2021 – Dec 2023

- Built and supported accounting and operational workflows with C#, .NET Framework, WPF/XAML, EF6, SQL Server and DevExpress.
- Investigated production failures involving Entity Framework tracking, SQL and data integrity, memory use, performance and Office integrations; verified fixes through functional testing and release support.
- Integrated Outlook access for more than 5,000 email items and implemented 15-minute idle logout across 100+ application windows.
- Delivered ledger, reconciliation, multi-currency and inter-company workflows; reviewed code and mentored junior developers.

Software Engineer | Sep 2019 – Jul 2021

- Developed sales, purchasing and inventory features across C# interfaces, business logic and SQL Server changes based on user requirements.
- Reproduced defects, corrected data issues and tested fixes to restore business workflows before deployment.

SELECTED PROJECT WORK

SmartERP engineering evaluation · MSc dissertation | 2026

- Evaluated a bespoke finance ERP across six dimensions and produced a prioritised modernisation roadmap grounded in code and system evidence.

Task Management Platform · Team DevOps project | 2026

- As Project Manager, coordinated delivery of React and Django services and contributed to Docker, Jenkins and AWS ECR/EC2 deployment and verification.

EDUCATION AND RECOGNITION

MSc Software Engineering · University of Bolton | 2025 – 2026

BS Computer Science · Capital University of Science and Technology | 2019

Recognition: Two Employee of the Year awards at MicroKosm.
