PROFILE

Built and supported a C#/WPF finance ERP used by approximately 200–250 users across nine companies. Nearly six years of professional experience delivering accounting features and resolving Entity Framework, SQL/data, memory and Office integration defects. Progressed from Software Engineer to technical product delivery and guided five graduates during the ASP.NET Core/Angular migration.

TECHNICAL SKILLS

Core: C#, .NET Framework 4.6/4.8, WPF/XAML, SQL Server, Entity Framework 6, LINQ, DevExpress, Git

Web and APIs: ASP.NET Core, REST APIs, EF Core, Angular, TypeScript, DevExtreme, Postman

Support: Production support, incident investigation, data validation, performance troubleshooting, functional/API testing

Delivery: Requirements analysis, code review, SDLC, Agile/Scrum, release coordination, Jira, Trello

PROFESSIONAL EXPERIENCE

MicroKosm | Sep 2019 – Jul 2025

Technical Product Manager | Jan 2024 – Jul 2025

- Turned finance, procurement and inventory requirements into ERP specifications and release priorities for nine companies and approximately 200–250 users.
- Guided five graduate developers through the ASP.NET Core/Angular migration, reviewing authentication, role-based access, employee, chart-of-accounts and inventory features.
- Coordinated release delivery by prioritising user-reported issues, gathering stakeholder feedback and aligning developer tasks with business needs.

Senior Software Engineer | Aug 2021 – Dec 2023

- Resolved production failures by diagnosing Entity Framework tracking conflicts, SQL/data integrity issues, memory problems and Office integration defects.
- Built ledger, reconciliation, multi-currency and inter-company workflows for a nine-company ERP using C#, WPF, EF6 and SQL Server.
- Brought 5,000+ Outlook items into the ERP interface by building Office integration for email access.
- Implemented automatic logout after 15 minutes of inactivity across 100+ application windows.
- Reviewed code, mentored junior developers and verified application changes through functional testing and release support.

Software Engineer | Sep 2019 – Jul 2021

- Built sales, purchasing and inventory features by implementing C# interfaces, business logic and SQL Server changes from business requirements.
- Restored affected ERP workflows by reproducing defects, correcting data issues and verifying fixes before deployment.

EDUCATION AND PROJECTS

University of Bolton | MSc Software Engineering | 2025 – 2026

Capital University of Science and Technology | BS Computer Science | 2019
